

KARTHIKRAJ S

web developer

Profile

I gained practical exposure to UI/UX principles, responsive design, and core front-end technologies. In parallel, I earned a Python Certification from GUVI, further enhancing my programming and problem-solving abilities.

With a blend of analytical thinking and a keen interest in real-world applications of AI, I'm constantly exploring opportunities to grow in the fields of machine learning, data analytics, and web development.

I also improved key soft skills such as collaboration, adaptability, and communication. Working closely with a team, I developed a problem-solving mindset and learned how to receive feedback constructively.
